Not illustrated. 1876 Excerpt: . . . caused by the communication of Heat between a Surface and a Gas. Sir W. Thomson and Professor J. Perry, A graphical process for finding the form of a Hanging Drop, and other cases of the Capillary Surface of Revolution. J. Pearson, Notes on the Tides. J. N. Schoolbred, On the Half-tide Level at Liverpool. J. N. Schoolbred, On the Tides in the Irish Sea. (The last two papers were read in Section G, Mechanical Science. ) The paper which excited the most interest of all the communications made in Section B (Chemical Seience) was Professor Cayleys memoir On the analytical forms called trees, with application to the theory of chemical combinations; it contained a complete solution of the problem of determining the number of hydrocarbons $C_{22}$ for any value of n. For example, for CKHW the author found that there were 799 isomers. The memoir was...
