W. (11871 and 21309), is a girl 16 years of age. She presents a somewhat emaciated, stunted appearance and has a listless manner. Present Illness. Complaint. - She first appeared at the Clinic September 5, 1917, with symptoms as given below, and was diagnosed as a chorea. She came again May 11, 1918, having been referred by the Roosevelt Hospital and also, apparently, by Social Service. Some two years before the latter date she had an attack of nervousness, her hands and lips shook and she dropped things. This lasted several months. A second, similar attack began in the summer of 1918 and lasted about two months. Before each attack she had vomiting and abscesses and was run down. She vomited for three months, couldn't keep things on her stomach during both attacks. Blood was vomited while in the hospital. She had fever, especially in the afternoon. Besides the above she had...
