Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Stocks are very complicated. They involve either very tricky gut calculations for they involve very unique calculations, both of which makes it very hard for someone to comprehend. This book helps you realize all of the potential possibilities you may have and helps you understand not only how to trade but how institutions, hedge fund managers, individuals, and corporations attain stock and get rid of it. This book talks about all of the above and in addition is coupled with algebra, from high school freshman algebra to collegiate algebra. Having a base foundation is very important and this book does exactly that, it helps you understand not only the complexities of the trading world but also the very basic minute details. Furthermore, this book helps you analyze the different types of investments you can make and if they really are beneficial to you. From the perspective of a very experienced trader who has many years of experience we bring you this book. Topics Covered: Stocks Commodities Real estate Money! Traders Day trading Long-term investments Algebra How to make money Residual income Example Algebra: Commutative Property of Addition Commutative Property of Multiplication Associative Property of Addition Associative Property of Multiplication If you need help understanding these topics then this book is for you!.
